DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, apparatus, in Paper No. 9/11/03 is acknowledged.

Claims 6-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected method, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9/11/03.

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 2-5, directed to the species of 2-6 no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance:

An emission spectroscopic processing apparatus including:

a first signal hold unit holding sequentially each of detection signals outputted from a subset of adjacent light receiving elements contained in a series of light receiving elements during a first period;

an adder unit adding together the detection signals of adjacent light receiving elements of the light receiving unit inclusive of the held detection signals of the subset of the adjacent light receiving elements; and

a second signal hold unit for holding sequentially sum output of the adder unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Smith, Jr. et al (US Patent No. 6,383,402 B1), Yano et al (US Patent No. 6,414,499 B2), Yao et al (US Patent No. 6,306,669 B1), and Yi et al (US Patent Application Publication No. 2003/0085198 A1) teach a plasma monitoring emission spectroscopic apparatus including a CCD array of receiving elements, wherein the analogue output of each receiving element is converted into a digital signal and sent to a signal processing unit.
